In this gripping insider's account, one of Tony Blair's most senior ministers tells the inside story of life at the heart of the New Labour government.

From the early days of Blair's premiership, when the party was united and optimistic, to the later years, when it was riven by division and scandal, the author provides a unique perspective on the key events that shaped British politics.

The author was a reluctant minister, but he soon found himself at the centre of some of the most important decisions of the Blair government. He was involved in the Northern Ireland peace process, the decision to invade Iraq, and the response to the 7/7 bombings.

The author's account is both personal and political. He provides vivid pen-portraits of the key players in the Blair government, including Blair himself, Gordon Brown, and Alastair Campbell. He also offers a frank assessment of the successes and failures of New Labour.

Westminster Diary is a must-read for anyone interested in British politics. It is a gripping insider's account of one of the most important periods in recent British history.

Praise for Westminster Diary

"A fascinating and revealing account of life at the heart of the Blair government." - The Times

"A must-read for anyone interested in British politics." - The Guardian

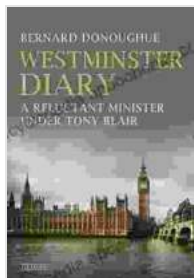

"A gripping insider's account of one of the most important periods in recent British history." - The Daily Telegraph
